

Paw Rank Agency ClickUp Operating Manual

Paw Rank Agency ClickUp Operating Manual

Purpose

This document is the operating context for managing Paw Rank inside ClickUp. It explains the workspace hierarchy, what every folder and list is for, where work belongs, how tasks should be created and managed, and how AI should interpret the system without needing the same explanation every time.

The goal is simple: every agency task should have one clear home, one accountable owner, a useful due date, enough context to execute, and a visible next action.

Workspace hierarchy

Space: 901811994332 (<https://app.clickup.com/90181522477/v/o/s/901811994332>)

The Paw Rank Space is the top-level home for the agency. It contains four functional folders:

1. 901815477262 (<https://app.clickup.com/90181522477/v/o/f/901815477262>)
2. 901815477255 (<https://app.clickup.com/90181522477/v/o/f/901815477255>)
3. 901815477261 (<https://app.clickup.com/90181522477/v/o/f/901815477261>)
4. 901815477258 (<https://app.clickup.com/90181522477/v/o/f/901815477258>)

There are currently 13 lists across these folders. The lists are set up, but the current workspace scan found no tasks in them yet. That means this structure is a clean operating framework ready to be populated, not an indication that the work areas are unnecessary.

Folder 1: Operations

Folder URL: 901815477262 (<https://app.clickup.com/90181522477/v/o/f/901815477262>)

Operations is the internal delivery and management layer of the agency. Put recurring systems, documentation, internal process improvement, weekly planning, and management control here. Client-specific execution should generally live in the relevant specialist folder instead.

List: SOPs & Documentation

List URL: 901819754963 (<https://app.clickup.com/90181522477/v/li/901819754963>)

Purpose: The source of truth for how Paw Rank operates.

Use this list for:

- Creating or updating standard operating procedures

- Documenting repeatable delivery workflows
- Building checklists and quality-control guides
- Recording tool instructions and internal playbooks
- Capturing lessons learned that should become a repeatable process
- Assigning owners for keeping documentation current

Good task examples: Create an onboarding SOP, document the content approval process, update the SEO audit checklist, write a client reporting procedure.

Do not use it for: One-off client execution that does not improve the agency system. Put that work in the relevant delivery list.

List: Weekly Management

List URL: 901819754964 (<https://app.clickup.com/90181522477/v/li/901819754964>)

Purpose: The agency control tower for planning, reviews, priorities, blockers, and recurring management actions.

Use this list for:

- Weekly planning and priority setting
- Reviewing active client and internal work
- Checking overdue tasks and blocked work
- Capacity and workload decisions
- Weekly reporting and leadership follow-ups
- Deciding what moves into the next week

Good task examples: Review weekly agency priorities, audit overdue tasks, prepare the Monday plan, review delivery capacity, close the weekly scorecard.

Do not use it for: Duplicating every execution task from other lists. Link to or reference the source task instead of creating duplicate work.

Folder 2: Social Media Marketing

Folder URL: 901815477255 (<https://app.clickup.com/90181522477/v/o/f/901815477255>)

This folder owns the social media growth engine, from strategy and funnel planning through content production, publishing, engagement, and performance improvement.

List: Strategy & Funnel Building

List URL: 901819754940 (<https://app.clickup.com/90181522477/v/li/901819754940>)

Purpose: Turn business goals into social media strategy, campaigns, audience journeys, and conversion funnels.

Use this list for:

- Defining audiences, positioning, and offers
- Building content and campaign strategies
- Planning lead-generation funnels
- Mapping calls to action and conversion paths
- Developing campaign briefs and monthly themes
- Connecting social activity to business outcomes

Task output should include: The objective, target audience, offer, channel, funnel stage, success metric, and next action.

List: Analytics & Optimization

List URL: 901819754951 (<https://app.clickup.com/90181522477/v/li/901819754951>)

Purpose: Measure performance and turn data into improvements.

Use this list for:

- Social performance reviews
- KPI tracking and reporting
- Identifying content winners and weak points
- Testing hooks, formats, CTAs, audiences, and posting times
- Recording insights and converting them into experiments
- Tracking whether changes improve reach, engagement, leads, or revenue

Task output should include: The metric reviewed, the finding, the decision, the owner, and the next test or change.

List: Outreach & Engagement

List URL: 901819754949 (<https://app.clickup.com/90181522477/v/li/901819754949>)

Purpose: Manage proactive audience interaction and relationship-building.

Use this list for:

- Comment and message engagement systems
- Prospect outreach
- Community participation
- Partnership and collaboration outreach

- Follow-ups with warm leads
- Engagement response standards and escalation rules

Task output should include: Who or which audience is being contacted, the intended outcome, the message or approach, the follow-up date, and the result.

List: Content Management

List URL: 901819754946 (<https://app.clickup.com/90181522477/v/li/901819754946>)

Purpose: Manage the social content pipeline from idea to publication and repurposing.

Use this list for:

- Content ideas and briefs
- Scriptwriting, design, editing, and approvals
- Captions, hashtags, and creative assets
- Scheduling and publishing
- Repurposing long-form content into social formats
- Maintaining a consistent publishing calendar

Task output should include: Platform, format, topic, hook, owner, asset link, approval status, publish date, and CTA.

Recommended workflow: Idea → Brief → In Production → Review → Approved → Scheduled → Published → Repurpose or Analyze.

Folder 3: Agency Growth

Folder URL: 901815477261 (<https://app.clickup.com/90181522477/v/o/f/901815477261>)

Agency Growth owns the commercial engine of Paw Rank: acquiring opportunities, managing outreach, and supporting the agency's own marketing and growth.

List: Sales & Outreach

List URL: 901819754962 (<https://app.clickup.com/90181522477/v/li/901819754962>)

Purpose: Manage business development from prospect identification through qualification, follow-up, proposal, and close.

Use this list for:

- Prospect research
- Lead qualification
- Cold and warm outreach
- Discovery calls and follow-ups

- Proposal and offer preparation
- Pipeline movement and lost-lead analysis
- Partnership opportunities

Task output should include: Prospect or company, contact, source, need, offer, stage, next follow-up date, owner, and outcome.

Rule: Every active prospect must have a next action and next-action date. A lead without a next action is not being managed.

List: Paw Rank Marketing

List URL: 901819754961 (<https://app.clickup.com/90181522477/v/li/901819754961>)

Purpose: Manage marketing for Paw Rank itself, separate from client delivery.

Use this list for:

- Agency positioning and brand messaging
- Paw Rank case studies and proof assets
- Agency website or profile promotion
- Lead magnets and campaigns for Paw Rank
- Social content that markets the agency
- Testimonials, reviews, and authority building
- Marketing partnerships and referral initiatives

Rule: If the task promotes Paw Rank as a business, it belongs here. If it delivers marketing for a client, it belongs in the relevant service folder.

Folder 4: Website & SEO

Folder URL: 901815477258 (<https://app.clickup.com/90181522477/v/o/f/901815477258>)

This folder owns organic growth, websites, search visibility, technical improvements, conversion-focused web work, and SEO reporting.

List: SEO Reporting

List URL: 901819754957 (<https://app.clickup.com/90181522477/v/li/901819754957>)

Purpose: Track recurring SEO measurement, reporting, insights, and recommendations.

Use this list for:

- Monthly or weekly SEO reports
- Ranking, traffic, impressions, clicks, and conversion reviews

- Client reporting deliverables
- Competitor and visibility comparisons
- Reporting insights and recommendations
- Creating follow-up tasks from report findings

Task output should include: Reporting period, property or client, metrics, key changes, interpretation, recommendations, and report link.

Rule: A report is not complete until its insights have been converted into actionable follow-up tasks where needed.

List: SEO Operations

List URL: 901819754955 (<https://app.clickup.com/90181522477/v/li/901819754955>)

Purpose: Manage the recurring and project-based work that improves organic search performance.

Use this list for:

- Keyword research and mapping
- On-page SEO
- Technical SEO audits and fixes
- Internal linking
- Metadata and heading improvements
- Content optimization
- Local SEO and citation work
- Backlink and authority initiatives

Task output should include: Target page or property, target keyword or issue, current state, recommended change, implementation details, validation method, and owner.

List: Funnel Optimization

List URL: 901819754954 (<https://app.clickup.com/90181522477/v/li/901819754954>)

Purpose: Improve the path from traffic to lead, inquiry, booking, or purchase.

Use this list for:

- Landing page improvements
- Calls-to-action and form optimization
- Conversion-rate experiments
- Lead qualification and routing

- User journey reviews
- Analytics and event-tracking improvements
- A/B test planning and results

Task output should include: Funnel stage, baseline conversion rate, hypothesis, change, success metric, test window, and result.

Rule: Funnel work should be tied to a measurable conversion event, not vague claims that a page should feel better.

List: Website Management

List URL: 901819754953 (<https://app.clickup.com/90181522477/v/li/901819754953>)

Purpose: Manage website maintenance, updates, fixes, launches, and general web operations.

Use this list for:

- Website updates and page changes
- Bug fixes and broken links
- Plugin, theme, hosting, and security work
- Landing page builds
- Website QA and launch checklists
- Performance and accessibility fixes
- Website backups and maintenance routines

Task output should include: URL or environment, issue or requested change, acceptance criteria, asset or copy links, QA steps, and launch owner.

How work should flow through the agency

1. Capture

Create one task for every meaningful piece of work. Use a clear action title that starts with a verb, for example: "Publish April LinkedIn campaign" or "Fix missing title tags on service pages."

2. Route

Choose the list based on the work's purpose, not the person doing it:

- Internal systems and documentation → Operations
- Social strategy, content, publishing, engagement, and measurement → Social Media Marketing
- Paw Rank's own marketing or sales → Agency Growth
- Website, SEO, organic growth, and conversion work → Website & SEO

3. Define

Every task should include:

- The desired outcome
- Context and background
- The specific deliverable
- Acceptance criteria
- Owner
- Due date
- Relevant client, campaign, platform, or URL
- Links to assets, documents, or references
- Dependencies and blockers

4. Execute

Use subtasks for distinct deliverables or handoffs. Use checklists for small repeatable steps. Do not turn every tiny action into a separate top-level task.

5. Review

The assignee owns completion quality. Reviewers should be assigned only when approval or quality control is genuinely required. Use comments for decisions and @mention the person who needs to act.

6. Close the loop

When a task is completed, record the result, link the final asset, and note any follow-up. If the work created a new repeatable process, create or update an item in 901819754963 (<https://app.clickup.com/90181522477/v/li/901819754963>).

Task naming standard

Use: **Verb + deliverable + scope + date or target when useful.**

Good examples:

- Draft 10-post LinkedIn campaign for Paw Rank
- Audit technical SEO issues on client website
- Prepare June SEO performance report
- Follow up with qualified lead after discovery call
- Update onboarding SOP with new approval step

Avoid vague titles such as “Marketing,” “SEO work,” “Check website,” or “Important.”

Priority standard

Use priority to show business impact, not personal anxiety:

- **Urgent:** A live issue, deadline risk, or revenue-critical blocker
- **High:** Important work that should be completed in the current planning window
- **Normal:** Standard planned work

- **Low:** Useful improvement that can wait without meaningful risk

Do not mark everything urgent. That destroys the signal.

Ownership and due dates

Every active task needs one clear accountable owner. Add collaborators only when they have a real role. Every task that matters needs a due date or a clearly stated recurring schedule.

If a task is blocked, document what is blocking it, who can unblock it, and the next follow-up date. Do not leave blocked work silently sitting in an active status.

Recurring work

Use recurring tasks for repeatable operations such as weekly management reviews, monthly SEO reports, publishing routines, regular analytics reviews, and maintenance checks. Keep the recurring parent task as the process anchor and use subtasks or checklists for that cycle's execution.

Cross-functional examples

New social campaign: Strategy & Funnel Building → Content Management → Outreach & Engagement → Analytics & Optimization.

SEO improvement project: SEO Reporting identifies the opportunity → SEO Operations executes the search work → Website Management implements web changes → Funnel Optimization measures conversion impact.

New client acquisition: Sales & Outreach manages the prospect → Paw Rank Marketing supplies proof and positioning assets → Operations handles the repeatable onboarding process → the delivery work moves into the relevant service lists.

Weekly management rhythm

At the start of each week, review 901819754964 (<https://app.clickup.com/90181522477/v/li/901819754964>), overdue work, due dates, workload, blockers, and the highest-impact outcomes for the agency.

During the week, work from the specialist lists and keep task statuses current. Do not use Weekly Management as a second copy of every task.

At the end of the week, review completed outcomes, carry forward only real priorities, close stale tasks, capture lessons learned, and update 901819754963 (<https://app.clickup.com/90181522477/v/li/901819754963>) when a process changed.

How AI should use this document

When asked to manage Paw Rank work:

1. Treat 901811994332 (<https://app.clickup.com/90181522477/v/o/s/901811994332>) as the agency's top-level Space.
2. Resolve the correct folder first, then the correct list.
3. Do not assume "Paw Rank" is a folder. It is the Space.

4. Use the list purpose above to decide where a task belongs.
5. Prefer existing tasks over creating duplicates.
6. Before creating a task, check whether a matching task already exists.
7. Ask for clarification only when the client, deliverable, owner, due date, or destination list is genuinely ambiguous.
8. When reporting work, include the task's list and current status.
9. Never claim a list is missing just because it is empty. Distinguish between an empty list and a list that does not exist.
10. If a request spans multiple lists, break it into linked tasks with clear dependencies rather than putting everything in one vague task.

Quick directory

Space: 901811994332 (<https://app.clickup.com/90181522477/v/o/s/901811994332>)

Agency Growth: 901815477261 (<https://app.clickup.com/90181522477/v/o/f/901815477261>), 901819754962 (<https://app.clickup.com/90181522477/v/li/901819754962>), 901819754961 (<https://app.clickup.com/90181522477/v/li/901819754961>)

Website & SEO: 901815477258 (<https://app.clickup.com/90181522477/v/o/f/901815477258>), 901819754957 (<https://app.clickup.com/90181522477/v/li/901819754957>), 901819754955 (<https://app.clickup.com/90181522477/v/li/901819754955>), 901819754954 (<https://app.clickup.com/90181522477/v/li/901819754954>), 901819754953 (<https://app.clickup.com/90181522477/v/li/901819754953>)

Current setup note

All 13 lists were found under the Paw Rank Space, and the current scan found them empty of tasks. The next practical move is to populate the system with recurring operating tasks, active client or agency projects, and the first weekly management cycle. Keep this document as the permanent context layer so future ClickUp or AI conversations can use the same structure consistently.
